For LOT "Radion content" there is a rule: the maximum amount of the grant of UAH 2 million can be increased by the amount of co-financing, but not more than UAH 1 million, even if the co-financing exceeds UAH 1 million.

3. An international cooperation project is a cultural and artistic project that involves the implementation of the project in Ukraine and / or abroad in partnership. The applicant must be a resident of Ukraine and one of the partners must be a non-resident. **The applicant and partner of this type of project cannot be a private entrepreneur.** Please note that in case of changing the partner after signing the grant agreement, the Foundation reserves the right to terminate the agreement unilaterally with a refund.

VI. How to Submit Application Package for Competition Programme

The application package to be submitted to the competitive selection of the Foundation includes the project application + cost estimate + extract from the USR + mandatory annexes.

The application package must be submitted only in the electronic form through the [official website](#) of the Ukrainian Cultural Foundation. The submitted application package must be signed by the **electronic digital signature of the head of the applicant organisation**. Make sure in advance that you have an electronic signature.

To submit the application package, the applicant must [create a personal online account](#) on the Foundation's website. If such an account has already been created, you can use it (there is a service for password recovery).

After you have created a personal account, it will automatically direct you to the home page of the website to select the appropriate competition programme → selection of the LOT → selection of the project type. After completion of these three steps, you will see the **“Submit application”** button on the right side of the screen — click it to start completing.

The application can be completed gradually — to do this, please use the **“Save”** button. For convenience, the completed application can be **“Printed”** — that is, displayed on a separate screen for reading or sent to a printer.

At the end of the application, there are special fields to upload the cost estimate, mandatory annexes to the project application and mandatory documents. After you have filled in all the fields of the project application, uploaded the cost estimate and annexes in the appropriate field, apply the electronic digital signature of the head of the applicant organisation and click **“Submit”**. After you have sent the application package to the Foundation, you will not be able to make any changes.

After sending the application package, the Applicant receives an e-mail notification on the successful submission of the application to the competition, indicating the project number assigned by the system (e.g. 4AVS11-12345).

After sending the application package to the Foundation, you can monitor its status at various stages of competitive selection. Please check the status of your application package — the competition calendar will help you to do this, where the deadlines for the notifications of the Foundation following the competitive selection stages are

indicated.

Project application

The project application must be completed in the electronic format. Please read the list of questions you are required to answer in advance on the website of the Foundation. We also advise that you read the expert assessment criteria – this will help you answer the questions in the application to be assessed (see [Methodology of Expert Assessment](#)).

The project application has built-in tips on the correctness of filling in its fields — **the letter “i” (information) in the upper right corner of the field.** If the field data format does not match the expected one (letters instead of numbers, etc.), the system will block sending of the application package.

Important:

The application may be corrected until it is sent to the Foundation. After it has been submitted, you will not be able to make any changes to either the text of the application or the uploaded documents. Also, you may not re-submit your corrected application package — the system automatically blocks this option. Therefore, we recommend that you check all documents before sending, create a separate folder on your PC, and transfer the final versions of the documents there. We recommend that you upload documents to the system from this created folder to avoid errors.

Cost estimate

Download the cost estimate form in the EXCEL format. The cost estimate must be submitted only in this form established by the Foundation. Please note that the detailed **instructions** for completing the cost estimate are in **one of the tabs** of the downloaded file — please read these recommendations carefully, they will help to draw up the cost estimate for the project in accordance with the requirements of the Foundation.

XII. Project Management Rules

Important:

The grantee must engage a professional accountant to keep accounting records of the project implementation costs.

Projects submitted to competitions of UCF may not be financed by any other donors or organisations for the same type of costs. If the fact of double financing at any stage of the competition or project implementation is established, the project will be excluded from the competition or the Grant Agreement will be terminated. If such fact is established at the reporting stage, the grantee must return the funds previously transferred to it under the Grant Agreement to the UCF.

After execution of the Grant Agreement it is **prohibited**:

- to change the name of the project;
- to replace the project coordinator/manager, producer, author or developer of the intellectual product;
- to increase the number of team members, except for those team members who participate free of charge or at the expense of co-financing;
- to change the functional duties of team members;
- to increase the amount of wages, remuneration under employment contracts, civil contracts and agreements with individual entrepreneurs who are team members;
- change and add new cost items not provided for in the planned cost estimate, without consent of the Foundation;
- change the items of the approved cost estimate within more than **10% of the grant amount** without approval by the Foundation (the grant amount cannot be increased).

In the implementation of the project with co-financing and/or reinvestment, the grantee must record **both the amount of the grant from UCF and co-financing and/or reinvestment in the report** — indicating the sources, list and amount of costs in quantitative and monetary terms.

The grantee is responsible for keeping account of the costs of the project on the basis of properly executed primary documents. The grantee must form the costs for implementation of the grant project in the accounting in accordance with the provisions of the National Accounting Regulation (Standard), Article 16 “Expenses” and subject the norms of the Budget and Tax Codes of Ukraine, the Labour Code of Ukraine, the Law of Ukraine “On Accounting and Financial Reporting in Ukraine” and other regulations.

The grantee is responsible for the data in the cost estimate and the report on the use of the grant amount. The grantee is **solely liable** for the obligations to third parties that have arisen during the implementation of the grant project.

Where the rules and procedures for grantees require public procurement and must comply with the national or international standards, along with the principles of transparency, proportionality, sound financial management, equal treatment and non-discrimination, the grantee must provide documents confirming the

performance of such obligations at the reporting stage in order to avoid any conflict of interest.

During the project implementation and until the end of the current budget period, the grantee does not have the right to earn profit from implementation of the project.

The grantee must be guided by the [Communication Guidelines](#) in respect of the project and use of the brand of UCF and the [Communication Strategy of the Foundation](#). Given the importance of reporting the results of the programme, the Ukrainian Cultural Foundation requests the grantee to post information about obtaining funding under the “Audiovisual Arts” programme on its official media resources (website, pages in social media).

A prerequisite for the completion of the project supported by the Foundation is the public presentation of the results of its implementation and posting of the report on the use of funds within the project on the official website of the Foundation.

XIII. Monitoring of Project Implementation

During the implementation of the cultural and artistic project by the applicant, the Foundation monitors its implementation, including monitoring visits to public events within the project or forms written requests for relevant information (in accordance with the Procedure for Monitoring of Performance of Obligations to the Ukrainian Cultural Foundation by Entities Receiving Funding). In the course of monitoring, the Foundation establishes how the grantee ensures the implementation of the project, assesses the effectiveness in terms of use of time, human, logistical, financial and other resources. The result of the monitoring and assessment is a monitoring report, which is an internal document of the Foundation.

In case of violation of the terms of implementation of the project, violation of the terms of use of funds or other circumstances stipulated in the Agreement, the Directorate of UCF may decide to terminate the Agreement, terminate funding with the grantee’s obligation to refund the grant funds.

Before sending the final reporting documents to the UCF, the grantee must fill in the **final monitoring questionnaire on the results of the project in the personal online office on the website of the Foundation**. These data are needed, inter alia, to measure the performance indicators of the Foundation and confirm the efficiency of the use of funds.

We recommend that you do not forget about the internal monitoring of your projects and collect up-to-date data on quantitative indicators of audience reach at public events within the project or during the promotional campaign, etc. To facilitate the data collection process, the Foundation has developed two standard questionnaires for project audiences. You can combine these questionnaires or add questions yourself. Questionnaire forms are given in annexes to these Guidelines for

applicants (see **Annex No. 5** and **Annex No. 6** to these Guidelines for applicants).

XIV. Reporting Procedure

No later than on the date of expiration of the Grant Agreement, the grantee must submit to UCF the **final reporting documents** on the 100% project implementation together with the independent auditor's opinion for the full amount of the cost estimate (including co-financing or reinvestment, if any). The Foundation verifies and analyses the project reports and sends comments, if any, to the grantee, who must respond to all comments and submit the required documents specified in the letter within the specified time. The balance of funds under the Grant Agreement must be transferred to the grantee after signing of the Project Implementation Certificate.

Final reporting is a package of documents in the paper form, confirmed by the independent auditor's report (please read the [requirements to the independent auditor's report](#)). Final reporting includes completed annexes to the Grant Agreement (**content report** and **report on receipt and use of funds for project implementation**) and other mandatory documents specified by the Foundation. [Control procedure](#).

Completed Annexes No. 3 and No. 4 to the Grant Agreement — a content report and a report on the receipt and use of funds for project implementation — are also submitted through the grantee's online account.

The grantee must also provide the Foundation with materials confirming the implementation of the project: printed materials (2 copies of each type), audio, video, photographic materials on electronic media, other cultural and artistic products created within the project.

The final report must be stitched (using a punch without the use of paper clips, staplers and files) and sealed by the audit firm.

A paper version of the final reporting documents together with all materials and samples of the final product (if available) must be delivered by the grantee **to the Foundation by a courier delivery service**.

The grantee is responsible for the data in the final report on the use of the grant amount.

Important:
