VII. How to Submit Application Package for Competition Programme

The application package to be submitted to the competitive selection of the Foundation includes the project application + cost estimate + extract from the USR + mandatory annexes.

The application package must be submitted only in the electronic form through the [official website](#) of the Ukrainian Cultural Foundation. The submitted application package must be signed by the **electronic digital signature of the head of the applicant organisation**. Make sure in advance that you have an electronic signature.

To submit the application package, the applicant must [create a personal online account](#) on the Foundation's website. If such an account has already been created, you can use it (there is a service for password recovery).

After you have created a personal account, it will automatically direct you to the home page of the website to select the appropriate competition programme → selection of the LOT → selection of the project type. After completion of these three steps, you will see the “**Submit application**” button on the right side of the screen — click it to start completing.

The application can be completed gradually — to do this, please use the “**Save**” button. For convenience, the completed application can be “**Printed**” — that is, displayed on a separate screen for reading or sent to a printer.

At the end of the application, there are special fields to upload the cost estimate, mandatory annexes to the project application and mandatory documents. After you have filled in all the fields of the project application, uploaded the cost estimate and annexes in the appropriate field, apply the electronic digital signature of the head of the applicant organisation and click “**Submit**”. After you have sent the application package to the Foundation, you will not be able to make any changes.

After sending the application package, the Applicant receives an e-mail notification on the successful submission of the application to the competition, indicating the project number assigned by the system (e.g. 4EVE11-12345).

After sending the application package to the Foundation, you can monitor its status at various stages of competitive selection. Please check the status of your application package — the competition calendar will help you to do this, where the deadlines for the notifications of the Foundation following the competitive selection stages are indicated.

Project application

The project application must be completed in the electronic format. Please read the list of questions you are required to answer in advance on the website of the Foundation. We also advise that you read the expert assessment criteria – this will help you answer the questions in the application to be assessed (see [Methodology of Expert Assessment](#)).

The project application has built-in tips on the correctness of filling in its fields — **the letter “i” (*information*) in the upper right corner of the field**. If the field data format does not match the expected one (letters instead of numbers, etc.), the system will block sending of the application package.

Important:

The application may be corrected until it is sent to the Foundation. After it has been submitted, you will not be able to make any changes to either the text of the application or the uploaded documents. Also, you may not re-submit your corrected application package — the system automatically blocks this option. Therefore, we recommend that you check all documents before sending, create a separate folder on your PC, and transfer the final versions of the documents there. We recommend that you upload documents to the system from this created folder to avoid errors.

Cost estimate

Download the cost estimate form in the EXCEL format. The cost estimate must be submitted only in this form established by the Foundation. Please note that the detailed **instructions** for completing the cost estimate are in **one of the tabs** of the downloaded file — please read these recommendations carefully, they will help to draw up the cost estimate for the project in accordance with the requirements of the Foundation.

The cost estimate consists of the following tabs: revenue side and cost estimate.

The applicant must complete all pages.

Please note that the column “**Cost Rationale and Breakdown**” on the cost estimate sheet is also mandatory. If the project involves co-financing and/or reinvestment, these columns are also mandatory.

The Foundation strongly recommends that you engage the accountant of your organisation at the stage of drawing up the project cost estimate — all recommendations for its completion are made in accordance with accounting rules and using the respective terminology.

Draw up the cost estimate based on the principles of efficient and rational use of state funds. In practice, this means that all costs must be economically justified and used solely for implementation of the goals and objectives of your project.

The column “Costs at the expense of reinvestment” must include **only eligible costs**, except for the costs for remuneration to members of the project team.

In the column “Co-financed costs”, you may include all types of eligible costs, **without setting cost limits** for individual items of the cost estimate, and **you may also include types of costs that are ineligible in accordance with the rules of the Foundation.**

During the project implementation and until the end of the current budget period, the grantee does not have the right to earn profit from implementation of the project.

The grantee must be guided by the [Communication Guidelines](#) in respect of the project and use of the brand of UCF and the [Communication Strategy of the Foundation](#). During the implementation of the cultural and artistic project by the applicant, the Foundation monitors its implementation, including monitoring visits to public events within the project or forms written requests for relevant information (in accordance with the Procedure for Monitoring of Performance of Obligations to the Ukrainian Cultural Foundation by Entities Receiving Funding). In the course of monitoring, the Foundation establishes how the grantee ensures the implementation of the project, assesses the effectiveness in terms of use of time, human, logistical, financial and other resources. The result of the monitoring and assessment is a monitoring report, which is an internal document of the Foundation.

In case of violation of the terms of implementation of the project, violation of the terms of use of funds or other circumstances stipulated in the Agreement, the Directorate of UCF may decide to terminate the Agreement, terminate funding with the grantee’s obligation to refund the grant funds.

Before sending the final reporting documents to the UCF, the grantee must fill in the **final monitoring questionnaire on the results of the project in the**

personal online office on the website of the Foundation. These data are needed, inter alia, to measure the performance indicators of the Foundation and confirm the efficiency of the use of funds.

We recommend that you do not forget about the internal monitoring of your projects and collect up-to-date data on quantitative indicators of audience reach at public events within the project or during the promotional campaign, etc. To facilitate the data collection process, the Foundation has developed two standard questionnaires for project audiences. You can combine these questionnaires or add questions yourself. Questionnaire forms are given in annexes to these Guidelines for applicants (see **Annex No. 4 and Annex No. 5** to these Guidelines for applicants).

The balance of funds under the Grant Agreement must be transferred to the grantee after signing of the Project Implementation Certificate.

A paper version of the final reporting documents together with all materials and samples of the final product (if available) must be delivered by the grantee **to the Foundation by a courier delivery service.**
